

## News & views from Summit Systems Summer 2018

### DEEP STATE – AN OUTCOME OF INDIFFERENCE / ACCEPTANCE

Whether you happen to like Trumpet or not, you may not wish to find out about what USA citizens have had to put up with in recent decades. It is easy to prove that Lee Harvey Oswald could not have loaded a bolt rifle in seconds required to shoot JFK. If you search the internet you will find that there was a conspiracy to take him down much like could be going on today. There were possibly 8 shooters and the final shot was at very close range as it blew off part of the head. The autopsy photos were conveniently described as “fantastic forensics” by those who were involved.

We are also led to believe that the Arabs happened to bomb the World Trade Centre when it was a controlled demolition. Thermite and magnesium were used at multiple locations to ignite the buildings at successive levels so that they collapsed in controlled sequence. Maintenance work (laying charges) was done on the 3 buildings during the night hours for 3 months prior to the event. The so called planes did not have markings but had belly pods of explosives and were travelling at 4000 kph. Building 7 did not get struck by a missile but still did the concertina percussion as had cleverly been arranged. If the missiles had been planes, their wings would have shattered on entry. The huge underground gold vaults were fortuitously emptied out just days prior to the demolitions. 1700 qualified engineers collectively stated the towers could not have collapsed / melted without help from planned sequential demolition.

More recent Presidents have been involved in the drug trade. “big daddy” has been engaged with in the Afghanistan cartels for many years and has been able to get the CIA to assist terrorists. Another has a super yacht called “Lady Michelle” that was recently captured with \$100 mil of drugs on board. The current President, is believed to have authorized the bombing of upto 400 drug facilities at the same time as he is building walls to control immigration from Mexico & South where thousands of drug barrons hail from.

WASHINGTON — U.S. and Afghan warplanes bombed 10 Taliban-controlled opium production facilities in Helmand province Sunday in the first major use of new White House-approved authorities to target the insurgents' revenue stream, the top U.S. general in Afghanistan said Monday.

American B-52 bombers and stealth F-22 Raptor fighter jets struck eight drug labs where the Taliban was producing narcotics, including heroin, from the vast poppy fields that it controls in the region, said Army Gen. John Nicholson. The Afghan air force struck two other facilities with their American-provided A-29 Super Tucano attack planes and Afghan commandos conducted a raid on a prison in a mission tied to the operation dubbed Jagged Knife.

Nicholson said the operation would continue to target much of the Taliban's 400 to 500 other heroin-producing facilities throughout the coming weeks. “This is going to be steady pressure that is going to stay up,” he told reporters at the Pentagon from his headquarters in Kabul. “We're not going to let up.” The strikes were conducted under new rules granted in August as part of President Donald Trump's reworked strategy for south Asia including Afghanistan, Pakistan and India. The strategy includes boosting American forces in Afghanistan by some 3,000 troops to the roughly 14,000 there now.

The new authorities also allow the United States to target the Taliban directly with airstrikes. In recent years, American warplanes could only strike the Taliban if it was in support of an Afghan security forces operation or to protect U.S. or NATO troops. Among the tools that Trump provided Nicholson was the ability to launch strikes such as those attacks Sunday designed to cripple the Taliban's narcotics network, which accounts for the bulk of its funds, the general said.

The Taliban is believed to take in about \$200 million yearly from poppy cultivation and opium production, Nicholson said. The insurgents have used the funding to achieve battlefield gains. They are now said to control more territory than at any other time since a U.S.-led invasion ousted the Taliban from power.

## IGNORE AND TOLERATE - DRUGS WILL DESTROY SOCIETY

We now live in a society where drugs are not only tolerated, they are accepted as the normal expression of a properly developed civilization. We even have church leaders that are highly critical of the European population that has not properly compensated the so called first nations who arrived about 700 years after Waitaha, Moriori and Mamoe. The same leaders also fail to teach that every man must work to provide family food.

In my view the criticism and acceptance of slothfulness, indolence with reliance on the unemployment benefit amounts to reverse racism. I have been required to help research and analyse then report many accidents in Northland where drugs have been involved. Medical people have either delayed the tests or have accepted urine samples as valid. A Polytechnic is able to assess to accredit druggies by the use of devious methods.

I recently had a young warrior scampering around my headquarters dressed in shorts on and he was doing "spider man crawls" in several of the rooms - pretending to be on the escape from another gang in town. Fortunately, we were able to call the Police and they arrived in quick order and commanded him to come down from the roof to where he had swung - aided by a pantry ladder. He was then handcuffed and taken away.

We also had a Consultant who had two rental houses in Kaikohe that were converted to "P labs." It cost about \$28,000 per house for the cleansing process (mainly covered by insurance). You can believe that her insurance premium went up accordingly.

When in Christchurch we were disturbed by a neighbor as there were loud explosions from time to time. We called the authorities to investigate a really loud explosion and the Police arrived plus the Fire / Emergency Service plus Ambulance services. In our view the call out was a perfectly reasonable and logical thing to do.

But the story did not end there. Since we live in such a wonderful society, we arrived back at our office a few days later and 11 windows had been blown out with a rifle. We called the Police but of course they could not find or apprehend the culprits. That would have been much too hard to prove and they have important things to do. The outcome was that our annual insurance premiums went up and we decided to leave the address.

My involvement in the drug world does not end there either. For several years I was in charge of pharmacy drug importation for CAHB. It became obvious to me that if we cooperated with Auckland and Sydney, we could demand much lower prices. The investigations however had to be abandoned as I was warned that a car would arrive at my home address and that it would be there to complete a mission in short order.

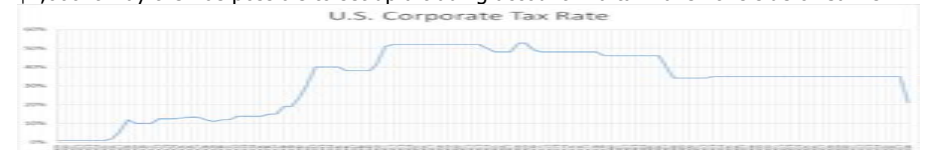

We are now forced to take extra precautions with new relationships. Recently, we were invited to help with a huge bond to help a friend move to a more adequate address. We now have to pay the price of societal tolerance and acceptance of drugs by some family members. It should be noted that only about 10% of Medical Doctors think marijuana is good. They are fully aware of the eventual consequences / deaths.

## NEWYEAR FOR TIMES OF CHANGE – TIMES OF THE END?

The new taxation laws for USA corporate means a flat standard 21% as shown in the table below which starts 1909 (about 3%) and plateaued after WWII (1950) at around 50% for 36 years - then fell to 35% in 1988 and has further fallen to 21% for 2018. The purpose of this information is to help you understand that there will be a flow on effect in other nations soon. In the meantime we have another round of the Nordmeyer solution to replace immigration. Mr Nordmeyer became famous for his sterling efforts to buy babies by the tens of thousands \$3,000 each. If you can risk the setting up of an offshore account and if you can find a spare \$1,000 it may then be possible to set up a trading account in a tax haven this side of Cairns.

We are informed that the Pope is in the process of changing the traditional Christian trinity once again back to the Babylonian version of father, mother and child. The Pope has now set up an alternative headquarters at the Tomb of David to become a world religious leader. The third temple is about to be built in Jerusalem. A bullet train now runs from Tel Aviv to the site.

There will be major changes in Eastern Europe and a huge war is soon to come between warring factions of Islam with Shiites on one side and the Sunnis on the other. The likely scenario will be Israel, Jordan, Saudi Arabia and possibly Egypt on one side. On the other side **Turkey** will lead Syria, Iran, Iraq, Libya, Sudan and Lebanon with possibly some help from Russia. This will eventually lead to WWII - it may take several years to happen. The Global Elite & Club of Rome may get their wish for at least 500 million people to die suddenly. Damascus will become a wasteland overnight according to prophesy (we doubt by the USA).

World finances are now in turmoil and in my opinion there is another game of pretend to stop cryptocurrencies when all along the financial elite and FEDS want to have digital currencies where they can control every dollar that is spent by every person. Early civilisation used sea shells for the purpose of coinage and the tulip mania is well known. Blockchain is now the pyramid game to provide the current generations with play dough. We recall the same thing happening about 40 years ago and there were quite fancy pyramid schemes in vogue. It will be important to make sure that you do not surrender your cheque book and insist on having a reserve account for any spare funds. We have been getting 3% on call at Heartland bank for our meagre spare funds but this is better than 1% from the traditional banks.

We are aware of reliable articles that suggest there will be a huge conventional bombing of North Korea about the middle of February. We also are aware that Russia is probably supplying oil to NK through the border and also via shipping. We know that the scriptures make it clear that there will be a major exodus from Iran. In our view this is likely to be caused by a huge earthquake setting off the Bushey(h)r refinery into a nuclear meltdown.

## **A NEW PARADIGM – PUBLICITY INSTEAD OF PUNISHMENT**

In our opinion there is a change of policy relating to offences and a variety of tools have been made available to the enforcement people. It is our belief that an experiment is under way and that instead of using prosecutions for the purpose of getting towards compliance there is a new mood or pretense that education will solve all of our problems and that the failure to achieve compliance was completely accidental and could not have been deliberate.

In the past we have been able to find and relay examples of prosecutions so that our clients have reliable information as to what and why would result in really large fines. Now it seems that the actual prosecutions will not be made public or will be exceptionally hard to find.

The new methodology (in our opinion) means that there will be -

- a) focused surveillance and attention to harms / events rather than avoidance incentives.
  - b) the appointment of assessors or helpers to offer guidance for an agreed fee.
  - c) a significant effort to provide educational information on the Departmental website.
  - d) publicity about actual prosecutions is delisted from Worksafe website or discreetly hidden.
- If this assumption is correct, it would explain the adverse publicity order option below.

### **Sentencing options (direct copy from Worksafe NZ website)**

Sentencing for criminal offences is governed by the Sentencing Act 2002.

A range of sentencing options is available to the Court if a charge is proven. The maximum fine available under the Health and Safety at Work Act 2015 generally is \$1,500,000 for a company or \$300,000 for an individual PCBU but a fine of up to \$3,000,000 for a company or \$600,000 for an individual PCBU and/or up to five years imprisonment is possible for those persons convicted of more serious 'knowledge based' offending.

In addition to a fine, a Court may order that reparation be paid to a victim of offending. This may be for loss or damage to property, emotional harm, or loss or damage consequential on any emotional or physical harm or loss of/damage to property. A Court may also make other sentencing orders under the Health and Safety at Work Act. **The available orders are:**

- Order for payment of regulator's costs in bringing prosecution
- Adverse publicity order
- Order for restoration
- Work health and safety project order
- Court-ordered enforceable undertaking
- Injunction requiring the offender to cease any action
- Training order

## **OUR WISH – OUR OFFER – OUR PROMISE**

Our goal always has been to deliver results and cost benefit to clients and we have put in genuine efforts to achieve this. We would like to make a Newyear bonus of huge value to all regular clients. It expires in 120 days.

Email or phone our office, ask for a copy of the **limited edition** of the audit log for **Business Performance Appraisal**. This is about 19 pages. We will post it to you. Ring us for help to get it completed. You post it back and we process it. You will find several ways to make huge savings in your business. This will be at no charge. It will take 1-2 hours of your time to answer the questions
